

A brief update from Cass Technologies and some options on getting back to a full work schedule.

Since the start of the lockdown period everyone's personal and work life has been affected. Many of us are now having to work from home, whilst also juggling looking after our children and elderly family and friends.

Going forward we hope the lockdown will be alleviate soon allowing us to get back to some normality, albeit a different one from before.

To enable us to get back towards working as efficiently as we did before Covid-19, and to ensure everyone is working in a safe, clean environment, we'll all need to implement changes in our working areas and procedures.

Here at Cass we can help implement some of those changes, such as;

- Securely working from a remote location

We can setup secure remote access to any office workstation/laptop. Remote users need a workstation/laptop at home to use. If they don't already have one, we have extensive stock of refurbished workstations/laptops available. We also have options available to loan suitable equipment.

- Safe working distances

If you have multiple users working in close proximity in your office space, we can help keep their working environment safe by relocating workstations/laptops to provide safe working distances, utilising areas that aren't currently used as office space. By implementing business wireless networks or specialised networking hardware we can provide the connections they need.

- Hosted cloud services

We can migrate your services (Files/Emails/Communications/Phones) onto the cloud giving you and your users complete freedom to work from any location.

The above are just a few suggestions to make working life easier as we come out of lockdown, we're happy to discuss your specific requirements and answer any questions directly, either give us a call or send us an email and we'll be glad to help.

We've implemented our own changes along the lines of the above and are available during our usual working hours, Monday-Friday 8:30-17:00. If any work can be performed remotely it will be. If an onsite visit is the only option, as long as sensible precautions are taken, we'll be able to make a visit.

We really appreciate your support through these uncertain times and hope you and your close ones are all well and keeping safe.

Many Thanks

Rob, Richard And Duncan
